Education

SRM Institute of Science & Technology Computer Science Bachelor of Technology CGPA: 9.61

Experience

Kattankulathur, Chennai, India

September 2021 - June 2025

Infosys | Specialist Programmer Mysore, India | January 2026 - Present

Built an Agentic AI-powered multilingual invoice auditing system using AWS Bedrock, LangChain, and LangGraph, automating OCR, validation, and anomaly detection reducing manual effort by 70% and improving processing speed by 3.

Engineered a scalable RAG-based pipeline with FastAPI and Streamlit, enabling real-time auditing of 5K+ invoices/month and improving discrepancy detection accuracy by 40%.

Implemented adaptive RAG and self-reflective agents, increasing audit accuracy by 30% and reducing false positives by 25%.

Seo Stack | Software Development Engineer - I Hyderabad, India | June 2025 - December 2025

Led migration from React to Next.js (SSG + pre-rendering), improving page load time by 45%, increasing organic traffic by 25%, and boosting SEO rankings (avg position 30%).

Built a keyword analytics and experimentation platform (10K+ keywords, 50+ domains) using Google Search Console APIs, reducing manual reporting by 70% and improving SEO decision efficiency by 40% with data-driven insights.

Developed an AI-powered support chatbot with streaming responses, resolving 60% of queries autonomously and reducing average issue resolution time by 35%.

Skills

Programming Languages: Libraries/Frameworks: Tools / Platforms: Databases: Java, TypeScript, JavaScript, Python

React.js, Next.js, Express.js, GraphQL, React Native, Spring Boot, LangChain,

LangGraph, Numpy, Pandas

Git, GitHub, CI/CD, Apache Kafka, Docker, Generative AI, AWS, RabbitMQ,

Sanity CMS

PostgreSQL, MongoDB, DynamoDB, Firebase, Supabase, Redis, Chroma,

FAISS

Projects / Open-Source

HealthCare+ | Link Next JS, AWS CDK, Python, RDS, Lambda, S3, Cognito

Architected and built a serverless healthcare platform using AWS and Next.js, reducing report interpretation time by 60% and improving accessibility with multilingual support.

Developed scalable Lambda-based microservices for authentication, secure file uploads, and PDF analysis, handling 10K+ documents/month with low-latency processing and end-to-end secure workflows (IAM, JWT, presigned URLs).

Integrated and optimized Gemini-powered AI for summarization and conversational Q&A, reducing model size by 90%, improving response time by 35%, and increasing user engagement by 40%.

Llama-Scholar | Link WhatsApp Hook, Python, Llama, Gen AI

Built a WhatsApp-based AI study assistant using LLaMA, RAG, and LangChain, enabling multimodal summarization (text, audio, image) and context-aware responses.

Improved student query resolution time by 60% through semantic retrieval and personalized answer generation.

Authenticcheck | Link Flutter, OpenCV, Python, TypeScript, WebRTC Built an AI-powered hiring integrity platform using computer vision and NLP, reducing interview

malpractice by 35% through real-time monitoring and anomaly detection.

Automated interview scheduling and monitoring workflows, reducing HR workload by 30% and improving operational efficiency.

Online KYC | Link AWS, Next JS, Python, WebRTC

Built a Video KYC automation system using React, Node.js, WebRTC, and AWS Rekognition, reducing onboarding time by 40% and enabling real-time identity verification.

Implemented compliance and security modules (JWT, encryption, audit logs) aligned with RBI standards, ensuring secure and auditable verification workflows.

Honors & Awards

Winner Standard Chartered Hackathon 2024

Winner Codefest Hackathon 2024

Finalists - FinTech Hackathon 2024

3rd Prize - Mozohack SRM 2024
